Projects

04/2022 – present	**Gift-chat-app** ↗ Gift-Chat-App is a social media website, I built this website within the space of one week and one day, and It's also my first social website.

04/2022 – present	**Gift-Calculator-website** ⬀
	Gift-calculator is a simple calculator which I build with the use of HTML,SASS and Javasrcipt in the test of my knowledge on how to use Javascript.
03/2022 – present	**Vestium-Design** ⬀
	Vestium Design is actually a project given to me as a test on my ability on how to use bootstrap in creating a website, basically this vesitium design is all about how you can purchase a dress and get it delivered to you, although this is only the landing page.
05/2022 – present	**EfeGift-Profile** ⬀
	This is actually a portifolio website I build with the use of HTML,SASS and JAVASCRIPT.

Courses

01/2022 – 07/2022	**Benefit of becoming a Web Developer,** *Frontend* ⬀
Abeokuta, Nigeria	Well actually I Started this course early this year and I am sure that I am capable of working on a real life project.
